Spring Creek Utilities Company Upgrades Booster Pump Station and Expands Pipeline

NORTHBROOK, Ill. – June 30, 2008 -- Utilities, Inc. (UI), a national water and wastewater service corporation, and its subsidiary Spring Creek Utilities Company, are proud to announce the completion of the upgraded Twin Tanks Booster Pump Station located in the 200 Tract of Spring Creek, NV. This approximately \$0.5 million project, completed in May of 2008, will increase the efficiency and reliability of the system to ensure that Spring Creek Utilities Company is equipped to meet the needs of this growing area. In addition to the booster station, a significant pipeline upgrade/extension was completed in the 300 Tract of Spring Creek, NV. This \$1.3 million pipeline replaces approximately 8,500 feet of distribution pipeline along Diamondback Dr. and Arroyo Vista Dr. with a new 12-inch main and adds another 4,000 feet of main to the system between E. Verdes Dr. and Scrub Oak Dr. This new pipe will provide an increased volume of water in the area to provide additional fire protection. It will also become a part of future system improvements which will increase volume and pressure in the area.

Later this year, Spring Creek Utilities Company will begin construction on four more new pipeline projects, which will include upgrades in the 100 and 400 Tracts, as well as new pipelines in the 200 Tract as part of a service-area expansion above the existing system. Two new storage tanks in the 200 and 400 Tracts are scheduled for construction this summer, as well. All of these projects have been designed to increase the system capabilities to alleviate current availability issues, as well as pressure and reliability issues within the existing system that existed from the initial developer's installation.

About Utilities, Inc.

Utilities, Inc. was formed in 1965 to provide developers with an alternative method to obtain water and wastewater utility service. Today, Utilities, Inc. is a portfolio company of AIG Highstar Capital, and through its approximately 90 subsidiaries, operates over 500 utility systems in 15 states and serves over 300,000 customers.
