NOTE: Customers shall be required to hire a licensed and bonded contractor to install the tap, water line and/or wastewater line at the customer's expense. Upon inspection, the Company will require property transfer of all lines extending from the main to your property line. This is required in order for the Company to maintain and operate this portion of the line. The extension from the property line to your home or the installation of a faucet is maintained as the property of the customer. Billing will commence for the above signed applicant on the day the meter is installed. A \$25.00 new customer charge will be applied to the account.

The service pipe shall be placed in accordance with the Indiana Plumbing Code and shall be installed in a trench at least ten feet (10') in a horizontal direction from any other trench wherein are laid gas pipe, sewer pipe or other facilities, public or private, unless otherwise specifically authorized and approved by the Company. Customer's service pipe shall be laid to the property line, at a point designated by an authorized employee of the Company before the Company shall be required to allow connecting such service pipe with the service connection

A meter spread must be installed in all homes by your plumbing contractor before water will be supplied for domestic use. The Owner or Customer shall provide at their expense a convenient clean, dry, safe place, not subject to a great variation in temperature so that the meter will be properly protected from freezing and other hazards. The meter shall be located for easy accessibility for installation, maintenance, reading, and disconnection.

Acceptable meter locations, so long as they meet the preceding requirements, include basements, utility rooms, furnace rooms, and meter rooms. Unacceptable locations include crawl spaces, closets, and under lavatory or kitchen sinks. Meter boxes are acceptable only for mobile homes without permanent foundations, buildings without heat, existing buildings that did not have water service and do not have an adequate location for a water meter, and lawn or garden watering systems.

For meters placed within a customer's structure, the customer shall cause to be placed, at the customer's expense, a shut-off valve on the service pipe at or near the inlet to the meter and another shut-off valve on the service pipe at or near the outlet side of the meter

CONTRIBUTION: All property contributions received by the Company pursuant to this Rule will be identified on the books of the Company as such. Acceptance of any such contribution shall constitute a contract between the Owner or Tenant, as the case may be, and the Company.

However, and in accordance with the Tax Cuts and Jobs Act, effective January 1, 2018, utilities including Community Utilities of Indiana, Inc. will have to begin paying incomes taxes on both, monetary and property contributions. Therefore, any the value of any property contribution will need to include a monetary contribution in the amount equal to 34.6620% of the contributed property value. Monetary Contribution = .346620 * Property Contribution.

WINTER CONSTRUCTION: No new service pipes or extensions of mains will be installed during winter conditions (when frost is in the ground), unless the customer shall defray all extra expense occasioned by such installation.
